

## PIPE CUTTING MACHINE

MODEL: ARIT 20

### PRODUCT OVERVIEW

**The Travaza ARIT 20 Pipe Cutting Machine** is a high-performance pipe cutting solution designed for precise and efficient cutting of **steel pipes** used in professional pipeline installations. The machine provides clean and accurate pipe cuts while maintaining excellent stability during operation.

Equipped with a powerful industrial motor and a robust cutting mechanism, the ARIT 20 delivers reliable performance for continuous operation in demanding environments, its durable structure and precision cutting system, ensure smooth cutting results with minimal vibration.

The compact yet heavy-duty design allows the machine to be used both in workshops and on job-sites, making it ideal for professionals working in construction, plumbing installations, fire protection systems, and industrial pipeline projects.

### KEY FEATURES

- Powerful motor for stable and efficient pipe cutting
- Precision cutting system for clean and accurate results
- Strong pipe clamping mechanism for secure operation
- Durable industrial construction for long service life
- Smooth cutting operation with reduced vibration.
- Compact and portable design for workshop or field use
- Easy operation with simple control system
- Reliable performance for continuous professional use

### APPLICATIONS

- Steel pipe cutting
- Fire protection pipeline installations
- Plumbing systems installation
- Industrial piping systems
- Mechanical pipeline construction

### TECHNICAL SPECIFICATIONS

Model:	ARIT 20
Applicable Materials	SCH40 Steel Pipe
Cutting Range	8" – 20"
Max Wall Thickness	12 mm
Cutting Speed	23 RPM
Motor Power	750 W
Power Supply	220V – 240V / 50 – 60 Hz
Operation Type	Electric

### STANDARD ACCESSORIES

- Cutting Blade
- Pipe Stand
- Operation tools
- User manual
