

CONDUIT BENDER

MODELS: BETA 25 / BETA 32

PRODUCT OVERVIEW

The Travaza Beta Series Conduit Benders are professional-grade pipe bending machines designed for precise and efficient **bending of electrical conduits** and **steel pipes** used in electrical installations, construction, and industrial applications.

Engineered with a strong steel frame and precision bending dies, the machine delivers smooth, **accurate** bends while maintaining pipe integrity. The stable tripod base provides excellent support during operation, ensuring safety and consistent bending results.

The Beta Series is ideal for electricians, contractors, and installation professionals who require reliable conduit bending performance on job sites or in workshops.

KEY FEATURES

- Heavy-duty steel construction for long service life
- Stable tripod stand for improved operational stability
- Precision bending dies for smooth and accurate bends
- Manual mechanical operation for easy use without electricity
- Compact and portable design for jobsite mobility
- Designed for electrical conduit and steel pipe bending
- Integrated pipe vice for secure pipe holding during operation

APPLICATIONS

- Electrical conduit installation
- Construction and infrastructure projects
- Industrial piping preparation
- Mechanical workshops
- Electrical contractor field work

ADVANTAGES

- Accurate and consistent bending results
- Durable construction for demanding environments
- Easy to operate with minimal maintenance
- Portable and suitable for onsite operations

TECHNICAL SPECIFICATIONS

Model:	Beta 25	Beta 32
Product Type	Manual Conduit Bender	Manual Conduit Bender
Conduit Capacity	20mm, and 25mm	20mm, 25mm, and 32mm
Pipe Vice	Included	Included
Frame Structure	Heavy-Duty Steel	Heavy-Duty Steel
Operation	Manual Lever Type	Manual Lever Type
Base Type	Tripod Stand	Tripod Stand
