

## EMT CONDUIT BENDERS

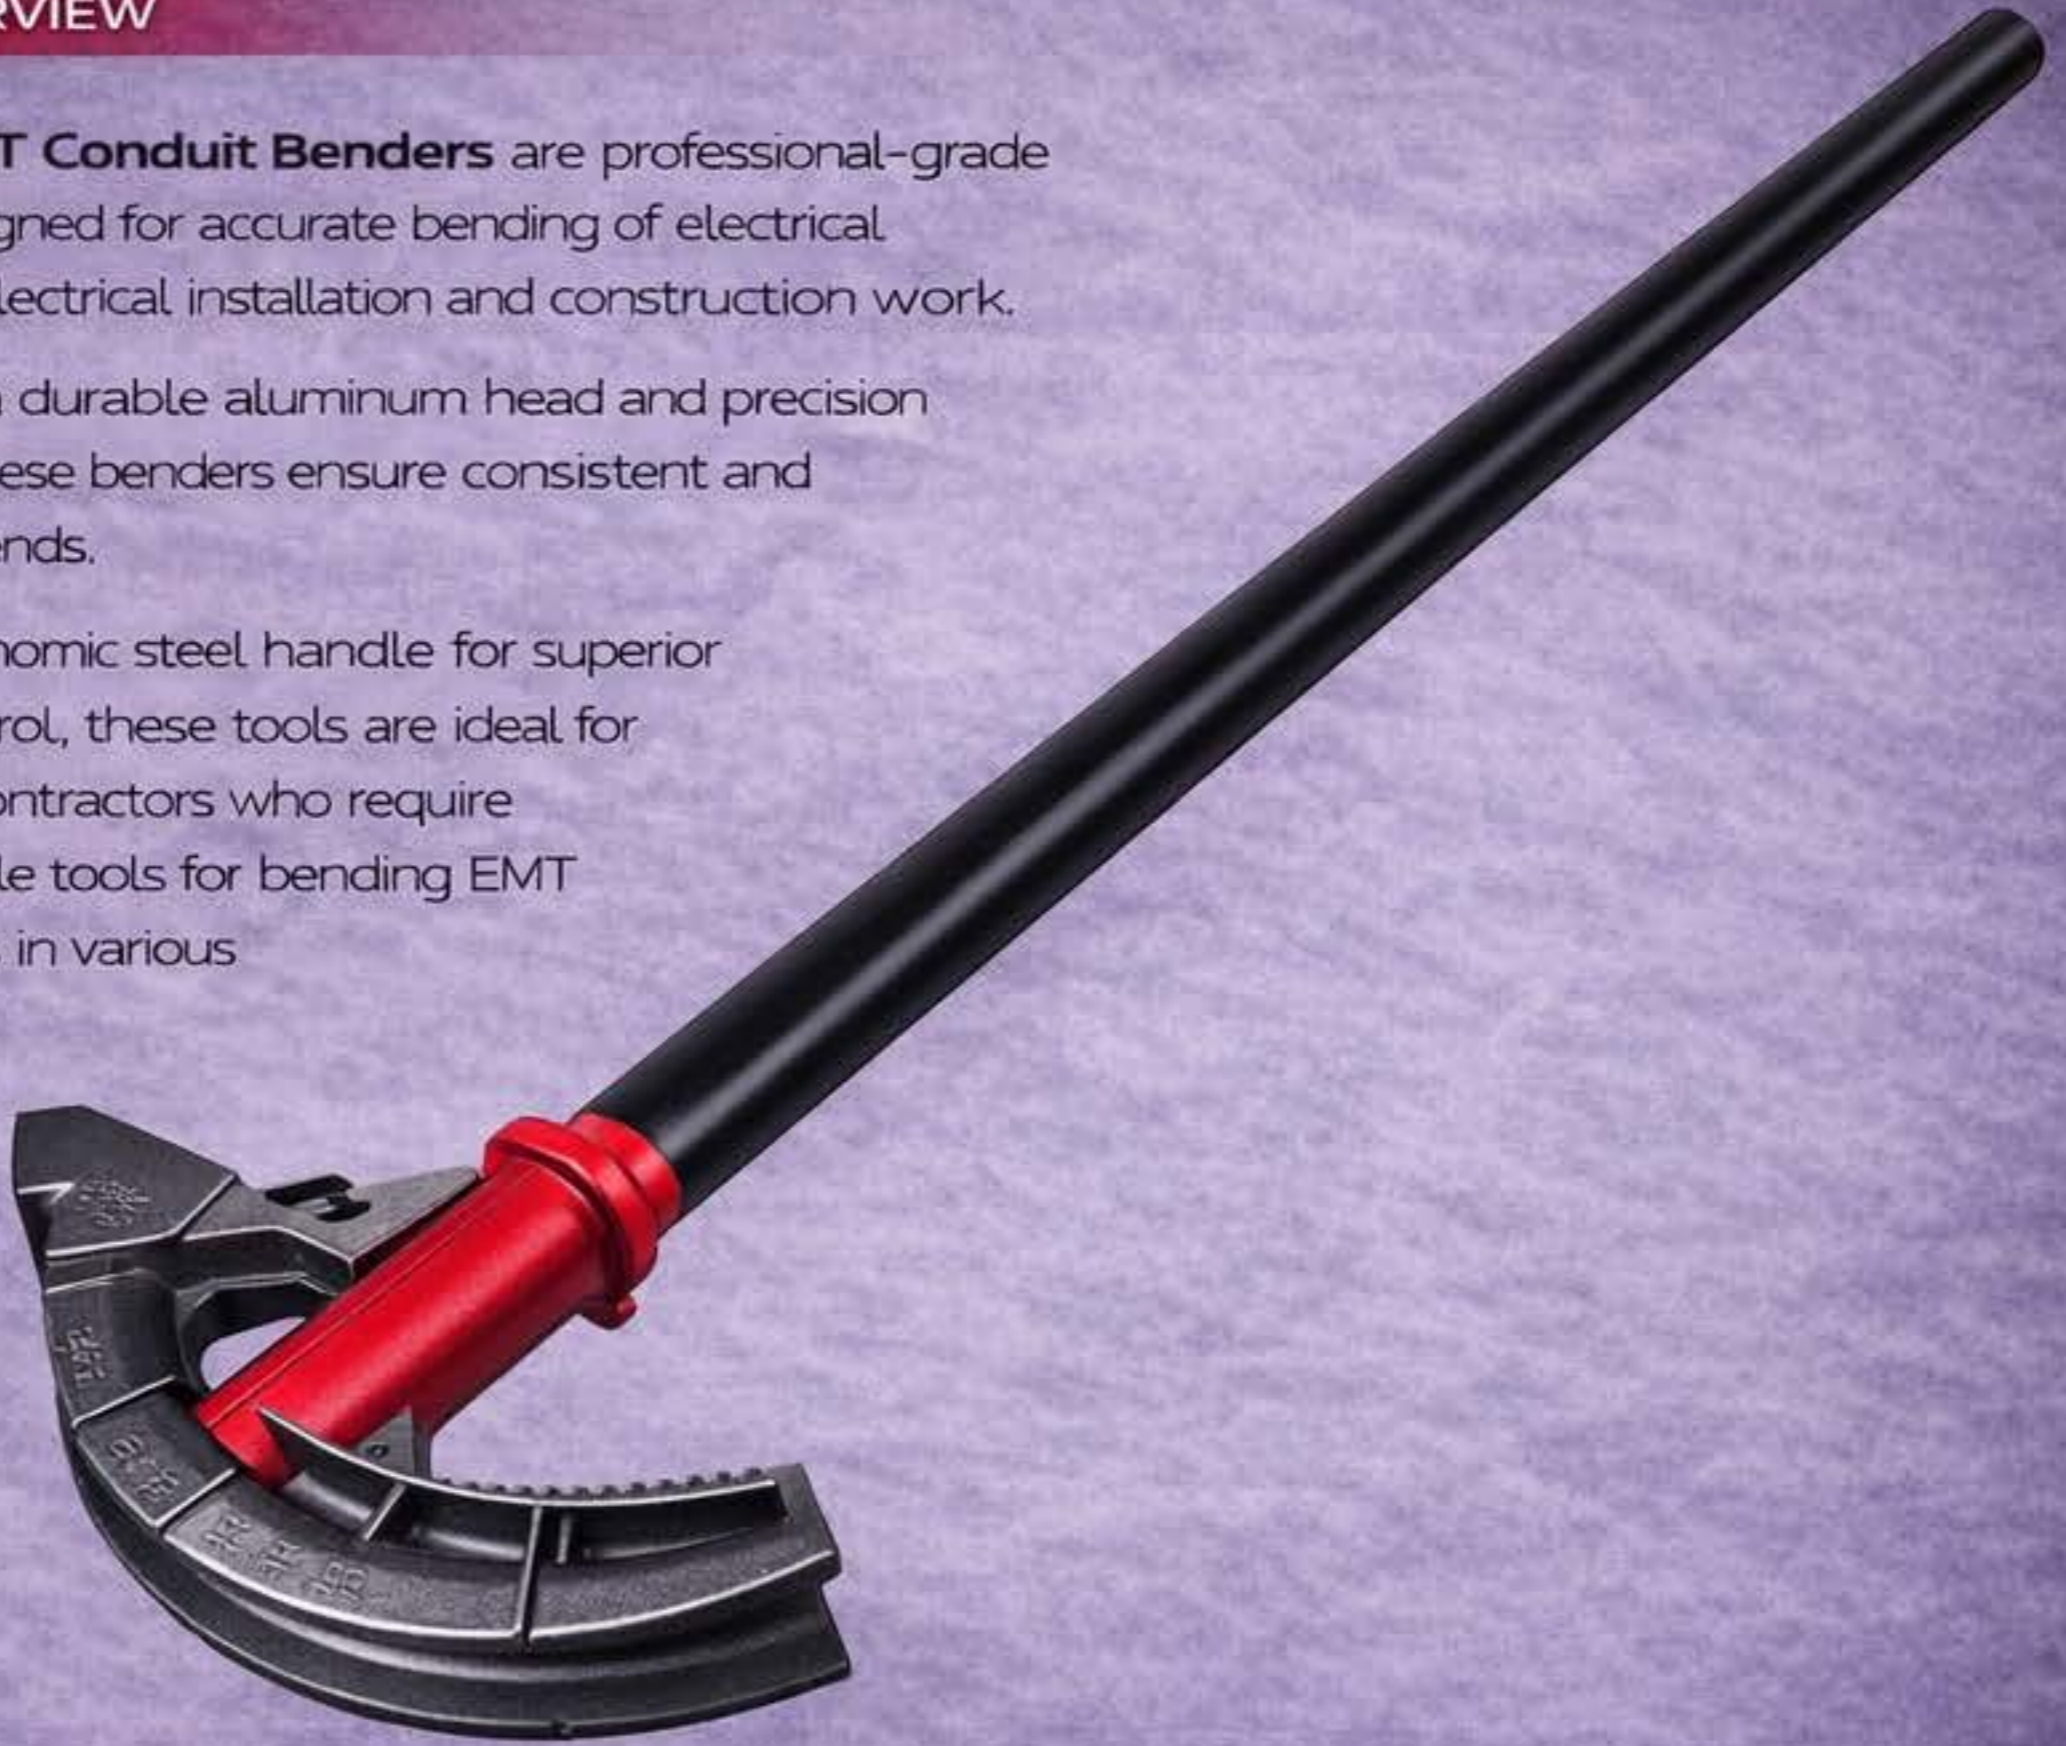

MODEL: EMT050 / EMT075 / EMT100

### PRODUCT OVERVIEW

The **Travaza EMT Conduit Benders** are professional-grade manual tools designed for accurate bending of electrical conduits used in electrical installation and construction work.

Engineered with a durable aluminum head and precision angle markings, these benders ensure consistent and precise conduit bends.

Featuring an ergonomic steel handle for superior leverage and control, these tools are ideal for electricians and contractors who require durable and reliable tools for bending EMT and rigid conduits in various job sites.

### KEY FEATURES

- Heavy-duty cast aluminum bender head for durability
- Precision angle markings for accurate bends
- Ergonomic steel handle for improved leverage
- Designed for EMT and rigid conduits
- Lightweight and durable for job site use

### APPLICATIONS

- Electrical conduit installation
- Commercial building wiring
- Industrial electrical systems
- Construction and maintenance work

### TECHNICAL SPECIFICATIONS

Model:	EMT Conduit Size	Rigid Conduit Size
EMT050	1/2"	-
EMT075	3/4"	1/2"
EMT100	1"	3/4"
Material	Aluminum / Steel Material	

### STANDARD ACCESSORIES

- Conduit Bender with Handle
- User Manual
