

TRAVAZA

BUTT WELDING MACHINE

MODEL: PROTIGA 1000

PRODUCT OVERVIEW

The Travaza Protiga 1000 Butt Welding Machine is a professional hydraulic butt fusion system designed for welding thermoplastic pipes and fittings. Suitable for HDPE, PP, and PVDF pipes, it ensures strong, accurate joints for water, gas, and industrial pipeline systems.

KEY FEATURES

- Hydraulic butt fusion welding system for plastic pipes
- PTFE coated heating plate
- High-precision pressure gauge
- Electric planing tool (facers)
- Low starting pressure for small diameter pipes
- Dual timer for heating & cooling phases
- Durable and portable design
- Ideal for workshop and field use

TECHNICAL SPECIFICATIONS

Model	PROTIGA 1000
Welding Range	630 - 1000 mm
Pipe Sizes	630, 710, 800, 900, 1000 mm
Materials	PE, PP, PVDF
Power Supply	380V \pm 10%, 50/60Hz
Total Power	22.7 kW
Heating Plate Power	17.5 kW
Planing Tool Power	2.2 kW
Hydraulic Unit Motor	3.0 kW
Max Temperature	Up to 270°C
Standards	CE, ISO21307:2011 (E), ISO12176-1, DVS2207/1 (08/2007)

OPTIONAL ACCESSORIES

- Electrical Crane
- Data Logger
- Support Roller
- Stub End Holder
- Different inserts (Single insert, ISO inserts)
