

## ROLL GROOVING CUTTING MACHINE

MODEL: PRISMATO C4

### PRODUCT OVERVIEW

The Travaza Prismato C4 Roll Grooving Cutting Machine is a heavy-duty hydraulic pipe grooving solution designed for producing precise grooves on **large-diameter steel pipes**.

Built for industrial applications, the machine ensures consistent groove quality for reliable pipe connections in large pipeline systems.

Equipped with a powerful hydraulic system and robust mechanical structure, the Prismato C4 delivers **stable** performance and high efficiency when working with large pipes. The machine provides accurate groove depth control and smooth operation ensuring professional grooving results in demanding environments.

Its durable construction, high-capacity pipe handling capability and user friendly controls make the Prismato C4 ideal for large-scale pipeline installations such as fire protection systems, industrial pipelines, and mechanical piping networks.

### KEY FEATURES

- Heavy-duty hydraulic grooving system for large pipes
- Stable grooving performance for industrial applications
- Precision groove depth control mechanism
- Robust steel frame construction for high durability
- Suitable for large diameter steel pipe grooving
- Smooth operation with reduced vibration
- Reliable performance for continuous operation
- Designed for large pipeline installation projects

### APPLICATIONS

- Fire protection pipeline systems
- Industrial piping installations
- HVAC pipeline systems
- Oil and gas pipeline installations

### TECHNICAL SPECIFICATIONS

Model:	Prismato C4
Pipe Capacity	8" – 32"
Applicable Pipe	Carbon Steel, Stainless Steel,
Maximum Wall	6 – 35mm
Power Supply	380V
Frequency	50 / 60Hz
Motor Power	2200W / 3Ph

### STANDARD ACCESSORIES

- Pipe Support Stand
- Drive roller 8" – 32"
- Cut tool 8", 10", and 22" – 32"
- Locating collar for 8" – 12", 14" – 16", 18" – 24", and 26" – 32"
- Foot Switch
