

Pipe bender 20 - 32mm

- > The machine is supplied with formers for bending 20, 25 and 32mm conduit.
- > A former is also available to allow the bending of 16mm conduit, adding to the versatility of this machine.
- > The unique universal vice mount allows a wide range of vices to be fitted, including those of other leading brands.
- > Vices can be secured right up to the edge of the mount, providing excellent clearance for the threading of pipe.
- > A new dual purpose stabilising and extension bar is also included with the machine, which can be used to gain extra leverage on down bends and act as a counter-lever on up bends.
